

24 August 2021

SEASIDE ESTATE, ST LEONARDS

BLUFF ROAD – NEW PAVEMENT CONSTRUCTION

Works associated with the full road closure in Bluff Road have now been completed.

The next stage of the works will see the north side of Bluff Road being constructed. The works will include the following activities:

- Sewer installation
- Stormwater drainage installation.
- Pavement widening.
- Kerb and channel construction.
- Asphalt sealing.

To facilitate these works it will be necessary, during working hours, to close the eastbound lane and use traffic controllers to control the flow of traffic passed the work site. Whilst traffic will still be able to travel along Bluff Road there will be delays and road users are asked to seek an alternative route. The road will be open to two-way traffic flow outside of working hours.

The traffic management is to be implemented from **31st August 2021 and will be in place at various times during the works until mid-December 2021.**

Access to properties adjoining the works will be maintained.

Wellam Constructions will make every effort to minimise, as much as possible, any impact these works will have on residents and road users and thanks you in advance for your co-operation and patience during the works.

For any further details, please contact our office on (03) 5221 4366, during working hours, and request the Project Manager overseeing the works.
